CULater — Release Notes
Version: v1.0.0 Date: 2025-05-08

Omer Ege Ozyaba, Addison Chen, Simon Reiterer, Chong Kai Cheng, Ho Zhe Shen

Overview
CULater's first release delivers a complete web-based task planner for the CUHK community, combining all of task, group, and schedule management in a single, user-friendly platform.

Functionality
• Account creation, login, logout, and license validation.
• Secure JWT authentication and role-based access control (Admin, Contributor, Reader).
• Task management: create, update, delete, and view tasks.
• Group management: create, update, leave, delete, and view groups.
• Assign tasks to one or more groups.
• Filter task list by selected group(s).
• Group sharing with in-app invitations and role selection.
• Responsive React UI with Material UI, Flask REST API, and PostgreSQL database backbone.

Bug Fixes
N/A – initial release.

Testing & Coverage
• View test plan document

Documentation
• Design & Implementation Document v0.2.
• Software Requirements Specification v0.1.
